

## **How to install Custom Content (CC) for The Sims 4**

Please make sure your game is fully updated through the Origin-client. Otherwise, CC by Milja Maison may not work as expected. Please note outdated CC may not function correctly with newer patches.

### **Installing Custom Content & Game Modifications:**

- Make sure to install the Custom Content and Game Modifications by placing the files in your 'Mods'-folder located at: *Documents/Electronic Arts/The Sims 4/Mods*.
